

Quick Start Solution

Oracle Manufacturing Operation Center (MOC)

Key Features

- Turn-key fixed fee solution for “high value process” monitoring
- Equipment and Executive Dashboards configured to your specifications
- Hardware and software pre-packaged to reduce startup costs
- Contextualization and transformation engine configured for your equipment
- Work with your team to “fast start” the use of Oracle’s OBIEE reporting and dashboard tools
- Simplified Integration to your ERP systems

Key Benefits

- Real Time shop floor visibility to specific equipment for plant managers
- Analyze Overall Equipment Efficiency (OEE)
- Improve uptime through active monitoring
- Alerts drive corrective action when action is needed
- Productivity throughput analysis

*Oracle Manufacturing Operation Center provides the pre built metrics and dashboards you need to gain visibility into your shop floor activities, analyze and improve plant throughput, and monitor equipment efficiency. **That’s great, but how do I get started?***

Fixed fee Implementation Service

Extendwerks provides the turn-key package you need to get Oracle MOC up and running, and capturing benefits related to shop floor visibility.

Package Includes:

- Database Appliance with pre-installed Oracle Software*
 - Oracle OBIEE
 - Oracle MOC
- Connectivity to as many as 4 supported devices
 - Hundreds of device drivers available to connect to your shop floor equipment*
 - Contextualization of the data from the device
 - Transformation of the data to the Oracle database
- Configuration of Equipment Dashboard Monitoring screen for each device connected
- Configuration of an additional Executive Summary Dashboard
 - Summary Screen with drill-down into actual data

**Oracle Software licensed separately. Equipment software drivers may be required at additional costs. Database Appliance is selected from pre-tested Extendwerks certified hardware providers.*
